**Re: UM 1930—PacifiCorp Comments on Proposed Revisions to the Program  
Implementation Manual**

PacifiCorp, d/b/a Pacific Power (PacifiCorp) respectfully provides these brief comments in response to the December 1, 2022 request from the Public Utility Commission of Oregon Staff (Staff) for feedback on the proposed revisions to the Community Solar Program (CSP) Program Implementation Manual (PIM) and the December 12, 2022 supplemental request for comments on the redline edits made to the PIM. Staff and the CSP Program Administrator (PA) drafted the modifications to reflect recent Commission orders and necessary changes for administration of the CSP.

PacifiCorp is appreciative of the time and consideration put forth by Staff and the CSP PA in drafting these modifications. PacifiCorp supports the proposed changes and agrees that they reflect the decisions made by the Commission. Additionally, PacifiCorp believes that the redline edits to the Project Implementation Manual (PIM) shared on December 12, 2022, accurately encompass these desired changes.

Sincerely,

Matthew McVee  
Vice President, Regulatory Policy and Operations
